Copy 1 of 5
10 October 1956

MEMORANDUM FOR THE RECORD:

TO: Contracting Officer [redacted] 10/10/56

SUBJECT: Telephone call to Hycon, Pasadena, California

1. Called Hycon 1515. 9 October 1956. In the absence of [redacted] I talked to [redacted]

2. Items discussed:

a. Instructed [redacted] to submit a detailed proposal to us for a positional indicator for the "B" camera. Proposal is for a device to indicate degree of obliquity throughout the entire camera cycle, accuracy, time and money entailed, etc. The proposal should be submitted to us at their earliest date.

b. Accuracy required for "C" camera obliquity as given to us by [redacted] on 8 October 1956. Our photogrammetrist stated they need an optimum accuracy of $\pm 1/2^\circ$ but that they can work with a minimum of $\pm 1^\circ$. This information was given to [redacted]. He stated since our conversation of last week in which [redacted] "C" Camera project engineer participated it was established they can approach the $\pm 1^\circ$ limitation. They have increased accuracy to $\pm 1/2^\circ$ at this time.

c. Informed [redacted] I had discussed [redacted] request for a Pilot's Handbook with [redacted]. Dick suggested a copy of the Handbook could be picked up at the Ranch. If Hycon encountered any difficulty obtaining one, [redacted] would be out in that area around 19 October and would attempt to help them.

d. "B" camera No. 5 arrived at the Ranch Monday, 8 October 1956. It will be checked out, returned to the factory and prepared for shipment to Detach B. No. 5 will be shipped to Detach. B next week and one of the two at Detach. B will be shipped back to the factory for overhaul. No. 5 should arrive at Detach. B around 15 or 16 October. [redacted] of Hycon who is a "B" camera specialist will arrive at Project Hqs. on 15 October 1956 enroute to Detach. B.
